OBJECTIVE

To obtain a position where I can utilize my formal training and experience as an entry-level software developer with a high-tech organization where I can learn about real world software development with a company that also promotes on-the-job training through increased responsibility, complex assignments, and assistance in diagnosing and resolving programming related challenges.

EDUCATION

Cumulative GPA: 3.86

The University of Tennessee at Martin
BS in Computer Science

Anticipated Graduation Date: December 2020

Jackson State Community College
Earned credits towards BS in Computer Science

Fall 2016 – Spring 2018

SKILLS

Ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.

Ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems.

Ability to analyze a problem, identify and define the computing requirements appropriate to its solution.

PROJECTS

Flood Algorithm Programs:

- Designed and implemented a flood algorithm, to find all neighboring nodes in reference to a node in a graph.
- Implemented in four languages: Java, C, Clingo, and Haskell

Asteroids Remake:

- Designed and implemented with a team to remake the Atari Game Asteroids.
- Built within a C# WPF, built from the ground up, utilizing threads

Miscellaneous Projects:

- Designed multiple programs that illustrated different Design Patterns
- Created our own chat system for digital communication

Current Projects:

- Recreating classic video games within the Unreal Engine 4.0
